

GTECHNIQ Presents

# PROTECT FOR THE FUTURE

A SUPERIOR WHEEL Coating

The best protection for wheels  
Repels brake dust and makes rims easier to maintain  
Excellent stain and contaminant resistance  
The chemical bond formed between the wheel surface and C5 makes the coating durable  
C5 will retain its integrity up to temperatures of 600°C (1112°F) making it suitable for all parts  
of your vehicle's rims and brake calipers
